

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Chimera S&P UAE UCITS ETF Fund (THE "FUND")

A sub-fund of Chimera UCITS ICAV (the "ICAV")

Class D ISIN IE00BKDMN700

This UCITS has appointed FundRock Management Company S.A. (Ireland Branch) as its Management Company

OBJECTIVES AND INVESTMENT POLICY

The Fund is an exchange traded fund ("ETF"), which seeks to provide investors with a total return, taking into account capital and income returns. The investment policy of the Fund is to invest 100% of its net assets in a portfolio of equity securities that consists of the equity securities of the Index. The Investment Manager may deviate from the 100% investment where it is, for whatever reason, not possible to buy and hold a particular Index security.

The Fund is passively managed which tracks the performance of the S&P UAE BMI Liquid 20/35 Capped Index (the "Index").

As it may be difficult, expensive or otherwise inefficient to purchase all the securities in the Index, the Fund may also hold Shares or other securities which produce a similar investment return to securities in the Index or may invest in collective investment schemes.

The Fund may enter into stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus of the ICAV.

The Fund base currency is AED (United Arab Emirates Dirham).

Shares of the Fund ("Shares") are listed on one or more stock exchanges.

Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

These shares are distribution shares. Income and capital gains may be distributed.

The Index

The Index seeks to measure the performance of the S&P UAE BMI, excluding those constituents with low liquidity and employing an alternate weighting scheme. The Index employs a 20/35 weighting scheme, where the largest stock's weight is capped at 35%, and the weight of any other stock is capped at 20%. The Index constituents are UAE domiciled companies, and as of 18 February 2021 comprises of 22 securities. The Index is rebalanced quarterly.

Investment in the Fund may be appropriate for investors who have a medium-term investment horizon.

For full investment objectives and policy details, please refer to the supplement to the prospectus for the Fund.

RISK AND REWARD PROFILE OF THE FUND

This indicator is a measure of a fund's volatility. The higher a fund's past volatility, the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The risk category was calculated by estimating the volatility of the Fund's return on investment expected over the next three to five years and may not be a reliable indicator of the Fund's future risk profile. The risk and reward profile shown is also not guaranteed to remain the same and may shift over time.

Why is this Fund category 6?

We graded the Fund a 6 because of the range and frequency of price movements of the underlying investments in which the Fund invests. The Fund's volatility has been assessed as higher risk.

Full details of risks are disclosed in the 'Risk Factors' section of the supplement and the prospectus.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Equity Risk:** Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.

- **Counterparty risk:** The Fund is subject to the risk that third parties with which the Fund may transact may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.

- **Tracking error risk:** The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

- There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the net asset value (the "Net Asset Value") of the Fund.

- It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the supplement and the prospectus.

CHARGES FOR THE FUND

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling it. Overall, they reduce the potential growth of your investment.

One-off charges taken before or after you invest.

Entry charge	None*
Exit charge	None*

This is the maximum that might be taken out of your money before it is invested.

Charge taken from the Fund over a year

Ongoing charge	1.00%
-----------------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
------------------------	------

*Authorised Participants dealing directly with the Fund may pay an entry charge up to a maximum of 5% and an exit charge up to a maximum of 3% of Net Asset Value. Although not charged directly to investors who are not Authorised Participants, these charges may have an impact on brokerage fees, transaction fees and / or the bid-ask spread. Currently, the Fund is not exercising its entitlement to apply entry and exit charges.

PAST PERFORMANCE

There is insufficient data to provide a useful indication of past performance to investors

The ongoing charge is based on the annual management fee paid to the Manager. The following expenses will be discharged out of the annual management fee, all operational expenses, costs attributable to the Manager, Depositary, Administrator, Investment Manager, Investment Advisor, Marketing Agent and Directors. It excludes portfolio transaction costs except in the case of an entry or exit charge paid by the Fund when buying or selling shares/units in another fund.

Because the Fund is an ETF, investors will typically only be able to buy shares in the secondary market. Accordingly, investors may incur brokerage and / or transaction fees in connection with their dealings. You should discuss these fees and costs with your broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal.

Please see "Fees and Expenses" section of the prospectus and the supplement for further information about charges.

PRACTICAL INFORMATION
