A sub-fund of Chimera UCITS ICAV (the "ICAV") (the "ICAV")

Class A ISIN IE00BKDMN692

This ICAV has appointed FundRock Management Company S.A. as its Management Company

OBJECTIVES AND INVESTMENT POLICY

Objective:
The Fund is an exchange traded fund ("ETF"), which seeks to provide investors with a total return, taking into account capital and income returns.
The investment policy of the Fund is to invest 100% of its net assets in a portfolio of equity securities that consists of the equity securities of the Index. The Investment Manager may deviate from the 100% investment where it is, for whatever reason, not possible to buy and hold a particular Index security.

The Fund is passively managed which tracks the performance of the S&P UAE BMI Liquid 20/35 Capped Index (the "Index").
As it may be difficult, expensive or otherwise inefficient to purchase all the securities in the Index, the Fund may also hold Shares or other securities which produce a similar investment return to securities in the Index or may invest in collective investment schemes.

The Fund may enter into stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus of the ICAV.
Shares of the Fund ("Shares") are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

RISK AND REWARD PROFILE OF THE FUND

This indicator is a measure of a fund's volatility. The higher a fund's past volatility, the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The risk category was calculated by estimating the volatility of the Fund's return on investment expected over the next three to five years and may not be a reliable indicator of the Fund's future risk profile. The risk and reward profile shown is also not guaranteed to remain the same and may shift over time.

Why is this Fund category 6?

We graded the Fund a 6 because of the range and frequency of price movements of the underlying investments in which the Fund invests. The Fund's volatility has been assessed as higher risk.

Full details of risks are disclosed in the 'Risk Factors' section of the supplement and the prospectus.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Equity Risk:** Shares of companies are generally considered high risk investments

and may result in fluctuations in the value of the Fund due to external factors.

- **Counterparty Risk:**The Fund is subject to the risk that third parties with which the Fund may transact may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.

- **Tracking Error Risk:**The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

- **Intellectual Property Risk:** Each Fund relies on a license and related sublicense that permits a Fund to use its Index and associated trade names, trademarks and service marks (the "Intellectual Property") in connection with the name and investment strategies of a Fund. Such license and related sublicense may be terminated by the Index Provider, and, as a result, a Fund may lose its ability to use the Intellectual Property.

- **Single Country Risk:**Where a Fund invests primarily in securities in a single country or a small number of countries, it may be subject to a greater level of risk and above average volatility, as compared to investing in a broader range of securities covering multiple countries.

There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the net asset value (the "Net Asset Value") of the Fund.

It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the supplement and the prospectus.
